In an exemplary exchange, an end-user uses client system 100 to execute a
browser program stored in memory 130 to request, retrieve, and display network
documents such as Web pages. Each request by client system 100 for retrieval of a
network document is formulated in accordance with the network protocol (e.g.,
HTTP) and transmitted across network 135 to server system 150. Server computer
150 receives HTTP requests such as request 144 and processes them using the
